Natural Radiance / Dramatic Appeal

In keeping with FiberMark's radiant collection of decorative coverings, the refined paperboards and bags are also available in many shades enhanced by the deep, rich color saturation of the products through and through.

With the elimination of white edges and a robust manufacturing process ensuring color consistency from lot to lot and throughout the sheet, FiberMark materials help to attract attention to products in the retail environment and significantly drive sales ... a must for upscale brands.

This collection represents just a sampling of the colors, special finishes and calipers available in FiberMark's luxury packaging portfolio. Couple any of the product samples with their respective product line swatchbooks to browse a more extensive selection of standard colors, textures and calipers, or personalize your own palette for a one-of-a-kind custom branded look.
