Elements ▶
Black 0401, 40pt

Machine Crafted / Aged to Perfection

In keeping with FiberMark's selection of premier decorative coverings, the machine-crafted paperboards are also available in full-bodied hues made visible by the deep, rich color saturation of the products through and through.

With the elimination of white edges and a robust manufacturing process ensuring color consistency from lot to lot and throughout the sheet, FiberMark materials help to elevate products in the retail environment and significantly drive sales ... a must for high-end brands.

The special batch of products represented in this piece is just a sampling of the colors, finishes and calipers available in FiberMark's luxury packaging portfolio. Pair this selection with the respective product line swatchbooks to browse a larger breadth of color, texture and caliper options, or create a blend of your own for one-of-a-kind custom branding.

70 Front Street, West Springfield, MA 01089 USA
